

# HeatShield™ Window Coating

## Product Features

### Savings. Comfort. Performance.

without sacrificing natural light

eTime Energy's industry leading HeatShield™ transparent liquid window coating is an alternative to traditional window films. The unique nanotechnology coating is engineered for durability, resulting in a long-lasting, smooth, transparent finish that is virtually invisible on your windows. Excellent window retrofit solution at fraction of cost to replace existing windows, ideal for commercial buildings.

#### Enhance comfort and reduce energy use

- Engineered for durability, will not peel, discolour or bubble
- Improve customer and employee experiences by reducing uncomfortable solar heat gain
- Reduce cooling costs and consume less energy
- Protect and extend life of furnishings

#### Warranty

eTime warrants our HeatShield coating meets product specifications at time of shipping and for fifteen (15) years against discolouration, peeling, bubbling or delamination from the glass, provided that product is installed by a qualified installer and maintained in accordance with window care instructions.

#### Product Technical Performance

Visible Light Transmitted	>70%
Solar Heat Gain Coefficient	0.55
Light-to-Solar Gain Ratio	1.27
Ultraviolet Rejection	>95%
U Value	0.61

#### LEED Credits

Solar control window films can be used towards LEED for Existing Building Certification in the following manner:

- SS (Sustainable Sites) – Credit #7, Light Trespass light pollution reduction
- EQ 8.2 (Environmental Quality) – Glare reduction
- EQ 7.1 – Thermal comfort
- EA (Energy and Atmosphere) – optimize energy performance
- O+M, IO – Innovation in operations, operations and maintenance
